## SUMMARY

B.Tech Computer Science student with experience in Python, machine learning, computer vision, and full-stack web development. Developed projects in sign language recognition, expense tracking, and code plagiarism detection, with hands-on experience in data preprocessing and feature engineering through an ML internship. Skilled in developing practical software solutions using modern programming languages, frameworks, and databases.

## EDUCATION

**SCMS School of Engineering and Technology, Ernakulam** 2023 – 2027
*B.Tech in Computer Science and Engineering | 8.2 / 10*

## PROJECTS

**Sign Sync — Sign Language to Text Converter** Python, OpenCV, MediaPipe, TensorFlow

- Built a real-time system that recognizes sign language gestures and converts them to text, improving accessibility for hearing-impaired users.
- Developed with Python, OpenCV, MediaPipe, and TensorFlow, with a web interface in HTML, CSS, and JavaScript.

**Split Smart — Shared Expense Tracker** PHP, MySQL, JavaScript

- Engineered a full-stack expense tracking web application with real-time balance calculations for multiple users.
- Executed a responsive frontend with HTML5, CSS3, and JavaScript and a scalable backend with PHP and MySQL.
- Architected a normalized database schema and developed 5+ REST API endpoints for CRUD operations on expenses and user groups.

**Code Verify — Code Quality and Plagiarism Detection Tool** Python, Streamlit

- Created a Python and Streamlit tool that compares two code files for plagiarism using structure (functions, loops, conditionals), variable names and patterns, and sequence of operations.
- Tested on 30–50 Python files; correctly identified 90–95% of plagiarized code with few false positives.
- Supports Python, Java, and C++ files.

## EXPERIENCE

**Machine Learning Intern — RP2, Kochi** Jun 15 – Jul 15, 2026

- Built a Python data preprocessing pipeline that cleaned 10,000+ dataset samples, removing duplicates and handling missing values to prepare for model training.
- Created 5–8 new features through exploratory data analysis (visualization, correlation analysis), improving model accuracy by 8–10%.

**Web Development Trainee — Smart Ed** 2026

- Completed an 8-week web development program covering HTML5, CSS3, JavaScript, React, Node.js, Express, and MySQL.
- Implemented responsive layouts for mobile (320px), tablet (768px), and desktop (1024px+) with a focus on usability and clean design.

## TECHNICAL SKILLS

**Languages:** Python, Java, C, JavaScript, PHP, SQL
**Web & Databases:** HTML5, CSS3, React, Node.js, Express, REST APIs, MySQL
**Libraries & Frameworks:** TensorFlow, OpenCV, MediaPipe, NumPy, Pandas, Streamlit, pdf.js, pdf-lib
**Developer Tools:** Git, GitHub, VS Code, Jupyter Notebook
**Core Concepts:** OOP, Data Structures & Algorithms, Agile, TCP/IP

## CERTIFICATIONS & ACHIEVEMENTS

- Grace Hopper Celebration India (GHCI) 2025 — selected attendee at India's largest conference for women in computing.
- ThinkerHub Hackathon — ranked Top 5 among competing teams.
- Python Programming Certificate — LCC Computer Education.
